Slings

Introduction

The Technical Reference Guide for slings contains a full overview of the Arjo sling range. Providing the right sling for the individual patient type and need, is vital, to promote optimal safety and comfort.

You will find descriptions of each product accompanied by images and specifications. Whether you're working at a hospital or in a care home, our slings are designed to meet the highest standards of quality and performance. Thank you for choosing Arjo.

Finding Arjo slings online

Arjo.com

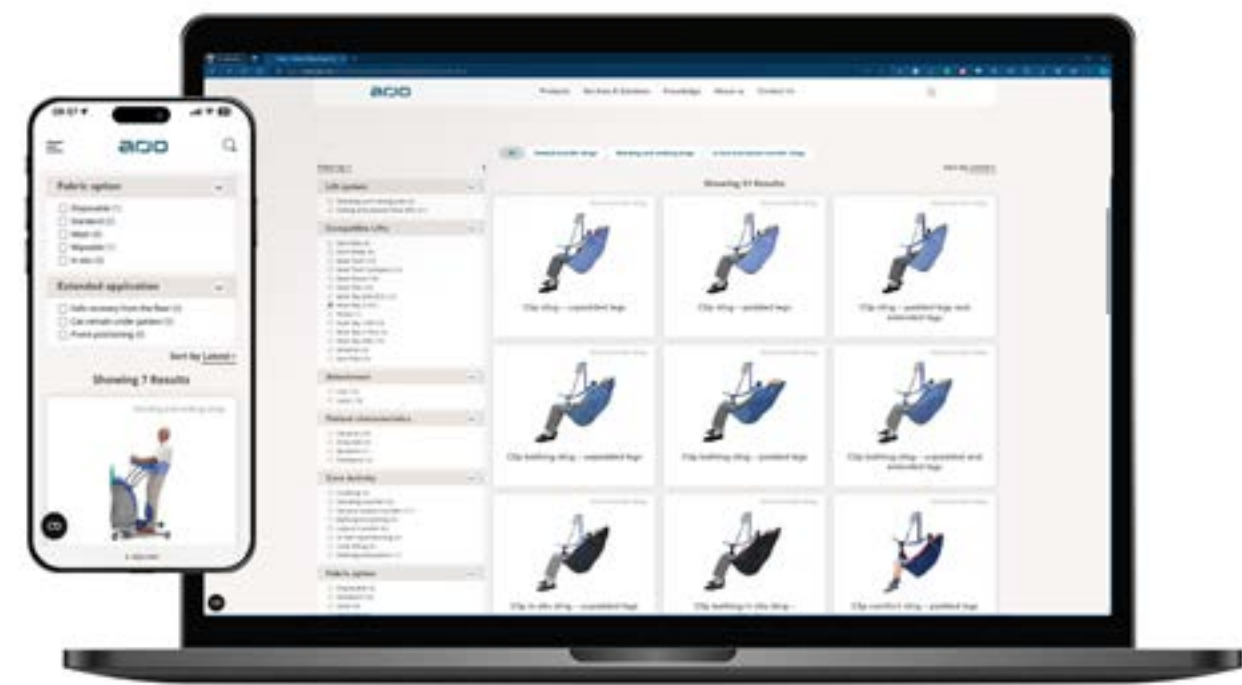

In the slings section on arjo.com you will find similar information to what is available in this document with detailed descriptions of each product, images and specifications. The Instructions for Use and marketing material are also available to download.

At the start page, there are several filtering options to support in locating a specific sling or group of slings in an easy and intuitive way. These are:

- Lift Systems - Standing and raising aids or ceiling and passive floor lifts
- Compatible Lifts - Maxi Sky, Maxi Move etc
- Attachment options - Clip or loop
- Patient characteristics - General, bariatric etc
- Care activity - Toileting, bathing, lateral transfer etc
- Fabric options - Mesh, disposable etc
- Extended application - Floor recovery, prone positioning etc

Search engines

If you know the name or article number of a specific Arjo sling and want to find more information, simply use the name or number as search terms. In most cases you will find the sling in the top of your search result with a direct link to the specific product page on arjo.com

Sling fabric options

Launderable

- Great durability and large selection of sling models.
- Full cleaning recommendations and instructions can be found on the sling label and within the Instructions for Use.

Disposable for single patient use

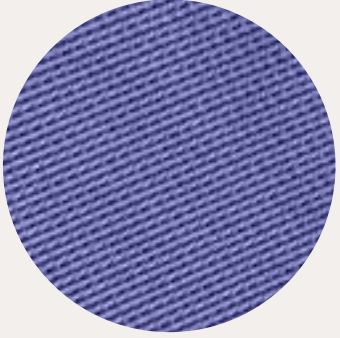

- To be disposed of if soiled, or once the patient stay is over.
- Meets infection control requirements.
- A trouble-free solution as no laundering is required.

Wipeable

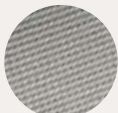

- Can be wiped clean and disinfected between patients.
- Minimises downtime as immediately available after wiping for use between patients.

LAUNDERABLE

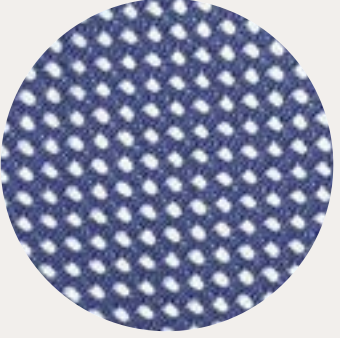

Knitted polyester fabric

- General purpose fabric.
- Durable and strong material for everyday transfers.

white grey

Knitted polyester fabric – mesh

- Durable and strong material for everyday transfers.
- Ideal choice for showering or bathing; the mesh allows optimal water dispersal.

white grey

Premium knitted polyester fabric

- Softer fabric for extra comfort.
- Durable and strong material for everyday transfers.

High strength woven polycotton fabric

- Available with bariatric repositioning slings.

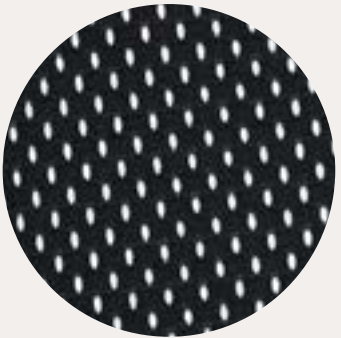

Woven polyester fabric (in situ)

- Suitable to remain under patients for a period of time between transfers*.
- Breathable
- Dissipates heat
- Drapable
- Antistatic

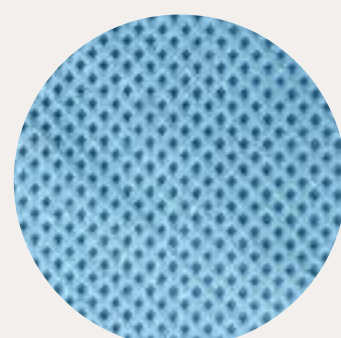

pale blue

Lightweight knitted polyester fabric – mesh (in situ)

- Softer fabric for extra comfort.
- Durable and strong material for everyday transfers.
- Suitable to remain under patients for a period of time between transfers*.

DISPOSABLE

Non-woven polypropylene fabric

- Disposable single patient use option limits the spread of infection, improving infection control.

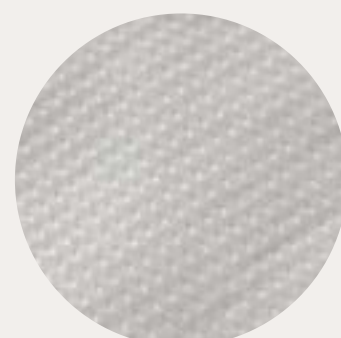

Woven polycotton fabric

- Disposable single patient use option limits the spread of infection, improving infection control.

High strength woven polycotton fabric

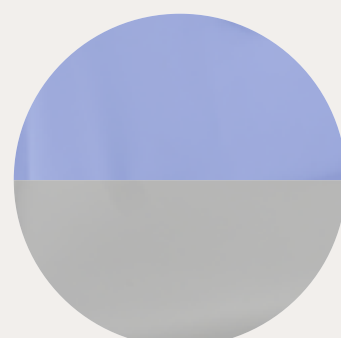

- Disposable single patient use option limits the spread of infection, improving infection control.
- For bariatric use.

Stitch bond non-woven polypropylene fabric

- Disposable single patient use option limits the spread of infection, improving infection control.
- Reinforced non-woven suitable for slings with higher Safe Working Load (SWL)

WIPEABLE

Polyurethane coated fabric

- Designed to be wiped clean between patients or residents to prevent cross-contamination.

*An assessment by a caregiver should always be done before leaving a sling under a patient between transfers.

Standing and walking slings

Page intentionally left blank

Slings for standing and raising aids

Slings to be used with Arjo standing and raising aids. Enable residents and patients to be raised up from a bed, chair, toilet or wheelchair for transfer and short distance transportation. The patient should be able to support their weight on at least one leg and have sufficient muscle strength in the upper and lower body.

For use with:

- Sara Flex, Sara Plus and Sara Stedy

Morphologies

- General population

Materials available

- Knitted polyester fabric (cache blue)
- Non-woven polypropylene fabric
- Polyurethane coated fabric

Main activities

- Standing transfers
- Toileting
- Dressing
- Repositioning in chair
- Sit to stand training/support
- Rehabilitation activities
- Ambulation

Ambulation slings for ceiling and passive floor lifts

Slings intended for assisted transfer and rehabilitation of patients/residents with limited ability to move. Gait training, rehabilitation, and ambulation activities can be performed with these slings.

For use with:

- Ceiling and passive floor lifts

Morphologies

- General population

Materials available

- Polyester knitted fabric

Main activities

- Sit to stand training/support
- Rehabilitation activities
- Ambulation

SARA FLEX STANDING SLING

The Sara Flex standing sling in conjunction with the lift enables a single caregiver to assist a patient or resident from a seated to a standing position, in one natural movement.

PRODUCT INFORMATION	
ARTICLE NUMBERS	TSS.500 (S) to TSS.504 (XXL)
Safe working load	200 kg (440 lbs)
Size	S M L XL XXL
Morphology	
Cleaning method	
Material	Polyester knitted fabric
COMPATIBLE LIFTS	
Floor lifts	Ceiling lifts

Slide sheets

Arjo slide sheets

Arjo slide sheets and tubes are designed to help caregivers carry out in-bed repositioning and transfers with less of the physical stress and strain associated with manual handling.

Slide sheets can also be used to help with sling application and fitting to reduce caregiver effort, help positioning and reduce risk of friction and shear on the skin.

With the patient in a lying position, a sling can be introduced between two flat slide sheets or be fitted with the patient in a side lying position using a slide sheet.

A slide sheet can be used to introduce a seated transfer sling behind the patient. It can also be used to guide the leg sections of the sling underneath /around each thigh.

The Arjo slide sheets are made of a premium low friction fabric that can be laundered and re-used multiple times. The sewn in handles gives a comfortable grip for pulling and the Arjo pull straps can easily be attached to the handles when extended reach is necessary.

Arjo disposable slide sheets & tubes

Arjo disposable slide sheets for single patient use are designed to accompany a patient throughout the hospital stay. They are available in different designs and sizes both as flat slide sheets with handles and slide tubes.

The flat sheets have sewn in handles giving a comfortable grip for pulling and the disposable pull straps can easily be attached to the handles when extended reach is necessary.

The disposable slide tubes have two surfaces that have been sewn together into a tubular design, which means that only one product is needed rather than two flat slide sheets to achieve the same friction reduction.

Disposable pull straps

The disposable pull straps can be attached to the sheets for lateral transfers avoiding caregivers having to overreach, thereby reducing the risk of injury.

Strong built-in handles

The built-in reinforced handles offer something to hold during patient transfers

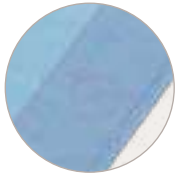

Patient identification tag

Each product has a tag to write the patient's name on and a green water-soluble label, which will dissolve if the sheet is laundered, offering you a visible indication when not to use the sheet.
